

The importance of digital skills in the 21st century

Riga Secondary School
No.80

Employment

Professionals who understand the use of social media for marketing and business purposes can help companies expand their brand's reach and attract more potential customers.

Email

Communication

Video conferencing

Digital skills also enable us to participate in online communities and engage in social activism through digital platforms.

Digital skills enable

01

To use automation tools to automate repetitive tasks

02

Freeing up time for more complex

03

Creative work

Personal development

Digital skills are vital
in the 21st century, not
just for professional
success.
